

课程项目2补充

PostgreSQL上的Similarity Join实现

测试查询

- Levenshtein Distance

```
select count(*)  
from restaurantaddress ra, addressphone ap  
where levenshtein_distance(ra.address, ap.address) < 4;  
2592
```

- Jaccard Index

```
select count(*)  
from restaurantphone rp, addressphone ap  
where jaccard_index(rp.phone, ap.phone) > 0.6;  
1653
```
